## About me

I am an active learner  who has completed an intensive Full Stack Web Development program from Concordia University. With an attention to detail, creativity and intuition, I am able to contribute to a dynamic workspace.

## Skills

Javascript, React.js, Node.js, Html5, CSS, Mongodb

Currently Learning: Firebase, TensorFlow

## Projects

### E-Commerce

**Demo:** https://www.youtube.com/watch?v=-uhcklQBTTY&ab_channel=kulbirsingh
https://github.com/Kulbir-Singh/E-commerce-project

**Technologies:** React, Redux, Node.js, Html, CSS

**Accomplishments**: This group project focused on a collaborative effort to build a fully functioning e-commerce website.  We've built features such as a cart, checkout page and filtering system.

### Finance

**Demo:** https://www.youtube.com/watch?v=NggTvNbes2k&ab_channel=kulbirsingh
https://github.com/Kulbir-Singh/Finance-Website

**Technologies:** React, Redux, Firebase, Node.js, Html, CSS, Mongodb

**Accomplishments:** The objective of this website is for users to create an account and be able to build a personalized finance portfolio. With features such as sharing articles, following other users, and saving articles, it allows the users to improve their financial literacy.
